I have over 12 years of experience as a SAP super user, specializing in multiple modules including MM, PP, WM, and SD. My career has been focused on international supply chain management, inventory optimization, and data analysis, leveraging advanced tools to enhance operational efficiency. I am well-versed in Lean Manufacturing principles, particularly within the automotive industry, and possess in-depth knowledge of key international standards such as IATF (Automotive), BRC, and HACCP (Food). My expertise in SAP, combined with my familiarity with these standards, has enabled me to lead optimization and continuous improvement initiatives in both production and logistics environments.

Skills

ERPs	SAP MM/WM/SD/PP and queries (SuperUser, 6 years), Oracle(Basic), BASIS 400(1 year)
Strengths	Resilient, Eye for details, Focus on goals, Motivator & Leader, Hard-working, Passionate, Focus on Automation.
International Standards	Six Sigma, Lean Management, IATF 16949, ISO 9000, ISO 14000, HACCP.
Programming	Power BI, DAX, JASP, Python (Basic), R, MATLAB (Basic), LaTeX.
Office	Excel including Power Query, Linux, Access, PowerPoint, Word.
Languages	Spanish (Mother Language), English(Intermediate).

Experience

Hunter Douglas

Atlanta, Georgia. US

INVENTORY OPTIMIZATION LEAD

Oct. 2023 - Present

- Working with IT to Development of new Key Figures in SAP/IBP to bridge current Business gaps
- Collaborating closely with analytics teams to transform abstract data into meaningful, actionable insights for supply chain operations.
- Key contributor to a multidisciplinary team responsible for developing global inventory strategy policies for Hunter Douglas across the entire organization.
- Developer of multiple business prototype tools to close business gaps including the following: Time Series Coverage View of Projected Inventory across the whole SC Network, Projection of Obsolescence, Scenario Tools.
- Key contributor of the EOL (End Of Life process.)
- Working closely with Finance to develop a Range of Coverage key figure for Obsolescence Projections.

LOGISTICS MANAGER

Oct. 2020 - Sept. 2023

- 9 years of experience in SAP Master Data, primarily in Materials Management and Sales Agreements.
- Extended knowledge of SAP Material Master configuration.
- Work alongside SAP Business Process Analysts and SAP consultants to implement customized solutions for the SAP JITM module
- Played a key role in the crisis management team, assuring the FIFO and defining precise clean points for LCI parts with rattle noise.
- Led initiatives to optimize domestic transportation and achieved a 10% reduction in costs, resulting in \$200,000 in savings.
- Attained a 98% accuracy rate in sales and inventory cost forecasting over the past 3 years.
- Achieved a reduction from 18% to 5% in the range of coverage of devaluation for obsolete materials.
- Drove workshop strategies that resulted in increasing availability of high runners to 99.9% and reducing a 50% of DOH from 10 to 5 days.
- Increase of Delivery performance from 85% to 95% by increasing the inventory turnover.
- Collaborated closely with partner BMW SC to improve our relationship, resulting in the successful de-escalation of the situation at the Atlanta warehouse.
- Successfully launched the 2023 BMW X5/6/7 and XM SUV program, with emphasis on the repackaging process.
- Implemented automated solutions for key logistics processes, including JIS Sequencing for Hall 50 at BMW SC and DelJit repack process for the Mercedes Benz plant in Cottdonale, AL, leading to a significant reduction in claims.
- Reduction of 60% of the attention time of incoming containers and trailers. Designed and implemented the shipping process and packaging materials for the successful launch of the new Mercedes Benz SUV Electric Car resulting in a smooth kick off.
- Proved experience in problem solving tools to de-escalate and crisis management, development of great communication skills with internal and external customers.

DEMAND/LOGISTICS PLANNER

Jan. 2015 - Jan. 2019

- A proven track record of success in Materials Management and Purchasing, including expertise in Material Master Records, Bill of Materials (BOMs), Work Centers, Standard Values Activity Types, Routings, Planned and Production Orders, MRP functionality, and Purchase Order Creation, Change, and Monitoring. Additionally, I am experienced in managing Goods Receipt, Invoice Receipt, Source Lists, and Information Records, all of which have contributed to the optimization and efficiency of material procurement processes.
- A wealth of experience in Inventory Management, with a demonstrated ability to manage key processes such as Goods Receipts, Goods Issues, Stock Transfer Orders, Transfer Postings, Movement Types, Physical Inventory, Vendor Returns, Stock Determination, and Reservations. Through my expertise in these areas, I have been able to optimize inventory levels, streamline processes, and ensure accuracy and efficiency in inventory management.
- Significant expertise in Warehouse Management, encompassing a range of critical areas such as warehouse structure within WM systems, basic stock management, storage location control, put-away and picking strategies, inbound and outbound deliveries, capacity checks, two-step picking, negative and zero stock checks, warehouse movements, cross-docking, handling unit management, storage unit management, mobile data applications, and transportation. This breadth of knowledge has allowed me to improve warehouse efficiency, streamline operations, and optimize storage and transportation processes for maximum effectiveness.
- Experienced in Sales and distribution: Supervision and correction of EDI/IDOCs transmissions 830 and 862, Creation of Scheduling agreements, Shipping Point Determination, Route Determination, Transport and Delivery Scheduling, Backward Delivery Scheduling, Partial and Complete Delivery, Subsequent Outbound Delivery Split and Grouping of Deliveries, monitoring of CUMS, reconciliation of CUMS.

Tegucigalpa, Honduras

SAP KEY/SUPER USER AND PRODUCTION PLANNER

Mar. 2013 - Jan. 2019

- Monitoring of incoming EDI transmissions from Customers TCode: WE05, ZIDOC, EMFOR, EMORD, EMJIT.
- Creation of Scheduling Agreements for series parts TCode: VA31/2/3.
- Creation of new material numbers (FERT and HAWA) TCode: MM01/02/03.
- Maintenance of Info records TCode: ME11.
- Maintenance of Interconnection of customer and internal part numbers, TCode: VD51.
- Maintenance of Inter-company purchase orders TCode: ME31L and ME01.
- Maintenance of material numbers from manufacturing locations.
- Creation of Delivery notes and Invoices TCodes: VA32/VL10HU/VL10A, etc.
- Monitoring of old Delivery notes open using SAP/NBP modules BI tools.
- Generating reports from Queries TCode: SQ00/KA.
- Manipulation of Handling units Tcode: HUMO, VLMOVE, etc.
- Monitoring of payable/receivables notes with FI team.
- Bianual release of testings.
- To Communicate company processes and interpret instructions from implementation team.
- To support in SAP SD modules to the shipping department with any error/issue to ship parts out on time.
- SAP final user support when they are stuck in errors.
- Release of testings in SAP/NOD or NOQ before these implementations are transported to SAP/NOP.
- Monitoring of Production orders created by end users.
- Monitoring of creation of BOMs and routing for Masterdata maintainance TCode MM02/MRP4.
- Monitoring of material administration TCode: MD04/05/06/07/09.
- Knowledge of WM modules i.e. LS24, LX03, LT10, LT22, LS01, MM/WM views.

BIMBO Group

Tegucigalpa, Honduras

FOOD SAFETY MANAGER · PRODUCTION MANAGER

Jan. 2010 - Mar. 2013

- Chief of Internal Auditors for Food Safety and Quality departments.
- Played a key role leading the implementation of the BRC Standard. Granting this certification in 2012 with 0 major nonconformities.
- Leading the implementation of HACCP and AIB Expert.
- Improve of production efficiency in a 10% reducing distances between machinery and removing redundant operations.

Education

UNAH (Universidad Nacional Autonoma de Honduras)

Tegucigalpa, HONDURAS

BACHELOR'S DEGREE IN INDUSTRIAL ENGINEERING AND BUSINESS ADMINISTRATION

Jan. 2003 - Nov. 2009

- My academic goal is to finish a Master's degree in Mathematical Engineering that I started at this same university.

UNAH (National Autonomous University of Honduras)

Tegucigalpa, HONDURAS

COURSING A MASTER'S DEGREE IN MATHEMATICAL ENGINEERING

Jan. 2017 - Jan. 2019

- My academic goal is to finish a Master's degree in Mathematical Engineering that I started at this same university.
